SKILLS

- Python
- C++
- JavaScript
- HTML, CSS
- SQL
- React Native
- UI/UX
- LaTeX

LANGUAGES

- Urdu (Native)
- English (Fluent)

EDUCATION

Bachelor of Science in Computer Science

Bahria University, Islamabad

Expected Graduation | Aug 2025

PROFILE

Bs Computer Science graduate with strong skills in Python, C++, and web development (HTML, CSS, JavaScript). Experienced in SQL database. Strong problem-solving abilities demonstrated through coursework and projects. Excellent teamwork and communication skills. Seeking opportunities to apply technical knowledge and grow in a dynamic tech environment.

EXPERIENCE

Projects

- Integrated AI solutions into healthcare scenarios, addressing real-world challenges
- Set up and configured AI models from scratch using open-source GitHub repositories
- A web application to manage gym memberships, schedules, and trainers.
- A database application to manage student records for a school or university.
- A graphical tool to visualize various sorting algorithms (e.g., bubble sort, merge sort, quick sort).

Final Year Project - *University Thesis*

- 'Integrating Personality Analysis for Meaningful User-Networking' Bachelor of Science in Computer Science
- Designed and developed a social media mobile app using React Native with Supabase backend for personality-based social networking.
- Developed an ensemble deep learning model by stacking CNN and GRU layers to perform MBTI personality classification from user-generated text data, achieving 80% classification accuracy.
- Applied similarity metrics (e.g., cosine similarity) to user interest profiles to effectively connect users with shared preferences and improve match relevance.
- Implemented a compatibility scoring algorithm using MBTI theory and shared interests to match users within the platform.
- Created user profiles with detailed personality insights, MBTI history, and personalized recommendations.
- Built a real-time chat system with Supabase, supporting 1-to-1 messaging between users.
