

[“PRINCIPLE OF MARKETING “]

Select a local brand and devise comparative BCG matrix analysis through observations & interviews at the retail outlet and then survey questionnaire from end consumers, later addressing the gap through Product Market Expansion Grid.

Comparative BCG matrix analysis

BCG Matrix Analysis from Restaurant End:

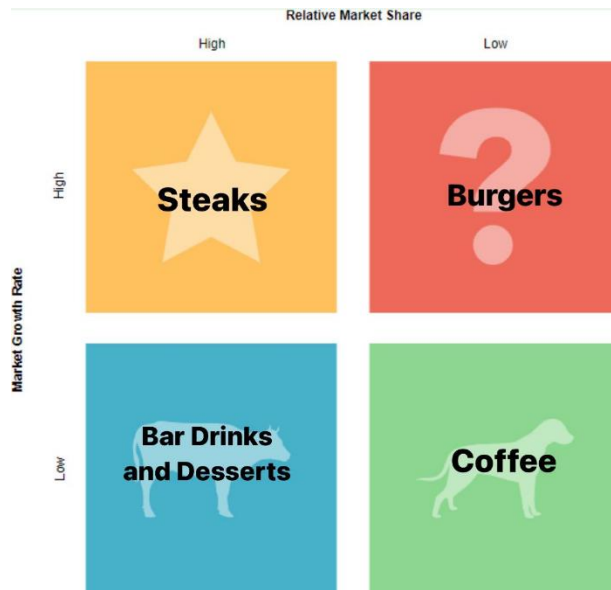

Through our observations and interview with BLT restaurant representative we manage to devise that which resulting products lineup in their menu we can classify into four categories - Stars, Cash Cows, Question Marks, and Dogs. Following is the BCG matrix devised by us.

Our analysis suggests that BLT Restaurant should devote more resources to its stone-grilled steaks (Star Product) so it can grow at a significant rate. The Bar Drinks lineup is the Cash Cow since it generates the most income but is growing slowly. To strive to improve its market share, the restaurant ought to think about investing in imported beef (Question mark). The desserts(dog) should either be phased out or repositioned to try to enhance its sales since it is not growing and has a low market share.

BCG Matrix Analysis from Customers End:

With the help of a survey we got to know what customers think about the BLT restaurant. With it we managed to make a BCG matrix dividing their menu into four major categories which are the star product, cash cow, question mark and the dog in view of the customer.

According to our analysis most of the customers have chosen steak as the most liked product bringing it under the category of star product. Burgers are one of the second most liked products having relatively low market share but high growth rate lining it under the cash question mark. According to the survey we would say that desserts and bar drinks are chosen to be a little expensive with low market growth coming under the cash cow category. Lastly coffee was analyzed as a little disliked product in terms of market growth and profit.

Survey result:

☐ Hello, what's your name? ▾	Restaurant Cleanliness ▾	Server Behavior ▾	What would you prefer more when yo... ▾	Would you recommend... ▾	Which Product do you like here the most ▾	Write here any suggestions that can improve BLT... ▾
☐ Aimen	3 / 5	5 / 5	Optimal Pricing	Yes	Desserts	The prices should be reasonable
☐ Khulood Qureshi	5 / 5	5 / 5	Food Taste	Yes	Juices/Cold Beverages	Shut up
☐ Rafay	5 / 5	5 / 5	Food Taste	Yes	Steaks	nu
☐ Yumna	5 / 5	5 / 5	Ambience/Aesthetics	Yes	Italian Cuisine	–
☐ –	4 / 5	5 / 5	Food Taste	Yes	Steaks	GuD
☐ USAMA BIRJI	5 / 5	3 / 5	Food Taste	Yes	Burgers	Work on all your menu rather than just burgers and steaks
☐ Sajjal	5 / 5	4 / 5	Food Taste	Yes	Steaks	–

Conclusion:

The difference in expectations, past experiences, and current perceptions of each side regarding the eating experience is referred to as the "gap" between the patron and the restaurant's retailer.

Customers enter a restaurant with preconceived notions about the standard of the food, the level of service, the atmosphere, and the overall experience. Consumers could expect the restaurant to suit their various tastes and dietary needs. Also, individuals have various expectations regarding the cost of the food and the worth of what they would get in return for their money.

Nevertheless, from the standpoint of the retailer, they have their own set of goals for the consumers they want to draw in, the food they want to serve, the degree of service they can offer, and the prices they can set. In terms of their capabilities, personnel, and facilities, they can also face restrictions and difficulties.

According to our analysis on the brand we selected, the major gap between the customer and retailer is about the price. Few customers find it very expensive and unaffordable especially when it comes out in going out with families. Another thing which we have observed would be the restaurant focuses more on its steaks and burgers and not the overall menu, the customers sound to be disappointing towards their other menu which includes desserts, drinks etc.

Overall, the restaurant was rated 3.5-4 stars and was recommended by most of the customers.

Product Market Expansion Grid:

With the Product Market Expansion Grid, we may determine possible areas of expansion for BLT Restaurant after evaluating the performance of each product using the BCG matrix. Market Penetration, Product Development, Market Development, and Diversification are the four strategies included in the grid.

-:Market Penetration:-

Through this strategy BLT restaurant can already take its most selling product and add more options of it, offering discounts, increasing the amount of used products to increase its market share as well.

-:Product Development:-

This strategy implies on developing new products for existing markets. BLT restaurant can use the insights gathered from the survey to develop new products that cater to the preferences of its existing customers.

-:Market Development:-

This strategy involves selling existing products in new markets. BLT can conduct a survey to identify new markets where there is a demand for its product. For example, BLT restaurant after identifying there is a demand for its products in Lahore , the restaurant can expand its distribution network to that city.

-:Diversification:-

This strategy implies on developing new products for new markets. BLT restaurant can use this strategy to develop a new product for a new market where it can cater to the preferences of the new market. For example, BLT can introduce a new product relevant to the local taste of the specific region/city people's preferences to acquire the new market first.
